\$0

The full field toolkit

- PTP fill
- Crew PTP review and approval, routed to the client portal
- Inspections hub with a QR code for each piece of equipment
- 15 inspection forms, 149 OSHA-referenced questions
- A critical "No" means TAG OUT, with a required note and photo
- Time entry, Documents and Incident reporting
- Safety-pro certification profile: completed vs in-progress certs, with exhibits
- Share by QR scan, email or print
- The QR opens a mobile-first PDF of the resume and certs, with a print version
- Cert expiration calendar (month and year views; red = expired or ≤30 days, orange = 31-60 days)
- Proactive 60-day renewal flags
- Team-wide renewal queue that creates notify and schedule-course tasks
- Daily forms backup to the office Synology NAS
- Procore integration (*in development*)

Full App

\$1,000/mo

Everything in Free, plus:

Safety Bot: AI voice-to-form

You speak the PTP, inspection or incident. The AI fills in the TS form, and a person reviews it and signs off. A critical "No" drafts the TAG OUT, and anything not said stays open to confirm.

- AI photo hazard check with citeable OSHA references **PROPOSED**
- Multi-site manager dashboards and reports **PROPOSED**
- Client portal branding **PROPOSED**
- Priority support **PROPOSED**
- Live Synology / cloud backup **PROPOSED**

Proposed add-ons are not committed features and are not priced.

Free sample: AI voice-to-form

Pick one form your crews use. Your team speaks a few real inspections, and you review every draft before anything is submitted. Sample terms are a draft.

Procore integration **IN DEVELOPMENT**

Planned: PTPs, the SSSP/EHS book, cert and renewal status, stop-work alerts, JHAs and TRIR/DART/LTIR flow into the GC's Procore project. Included in Free. Not live yet.
